Introduction

More than ever, our world is under threat with heavy dependence on fossil fuels, especially oil and coal.

Air pollution, environmental degradation and climate change are the result of this dependence.

Unprecedented global warming, rising forest fires, melting glaciers and rising sea levels are some of the problems caused by the excessive use of non-renewable energy.

The Ret team intends to break this dependence on non-renewable energy.

the team has included the aim of creating physical projects that will use wind and solar energy among their future plans.

Creating physical projects, in addition to helping to protect the environment, will also benefit Ret holders.

One of the important goals of the team is to involve Ret holders in the profits from the creation of physical projects.

Ret holders are therefore the future shareholders of the company.

Fossil Fuels

- **Global warming**
- **Non-renewable**
- **oil leak**
- **Environmental damage**
- **Pollution**
- **Endangering human health**
- **Damage to the ozone layer**
- **Increasing the amount of greenhouse gases**

These are just some of the disadvantages of fossil fuels,

Resources are running out and the earth is being destroyed,

The human dream of having an inexhaustible source of energy has existed for a long time.

Renewable energy

- Solve environmental problems
- Prevent wastage of fossil fuels
- Protection of natural resources
- Abundant
- clean
- Reproducible

These are just a few of the thousands of reasons why we should use renewable energy

**OUR GOAL IS TO SAVE THE PLANET AND
HUMANS**

What is ret

RET is a self-staking token Created on january 4, 2022 on the Binance Smart Chain network with contract renounced and Liquidity burnt, A decentralized project that seeks to create centralized and decentralized projects in the field of renewable energy.

It has the properties of every trade 1% fee redistributed to all holders,

1% additional fee on sell trades added to the burn wallet and 1% additional fee on sell trades added to the TEAM Wallet.

Security

- - No high severity issues
- - No medium severity issues
- - No low severity issues
- - No Dev Wallet
- ALL RET TRANSACTIONS CAN BE FOUND ON
THE BSCSCAN IN THIS LINK:

• Contract:

0x10b9dd394467f2CFbc769e07E88dC7e2c41B0965

• Developer :

Team:

0xEEDA1D57eAeC2e6bD237D552cc9D1FedcAe34f75

Ret supply

& TOTAL SUPPLY 50,000,000,000,000 RET

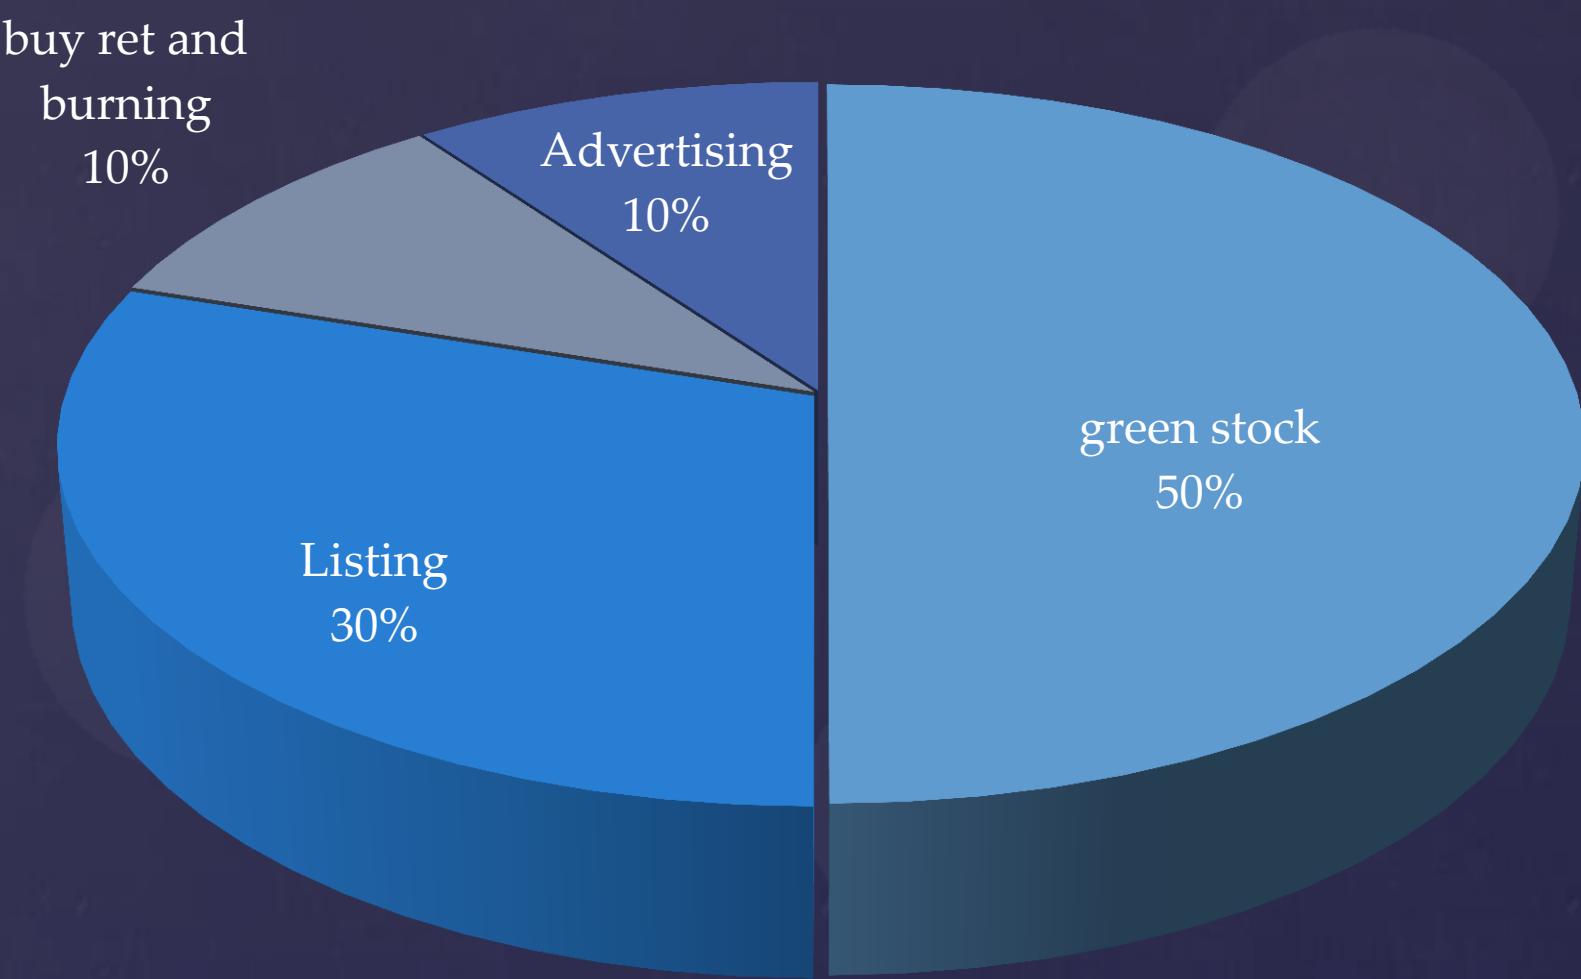

- We add 60% of RET total supply to Pancakeswap LIQUIDITY pool.
- 40% of RET total supply was sent to the dead address at the project's beginning.
- 9% of the pool purchased and transferred to the futures contract.

Ret & Milestones incoming

**10% of the revenue from physical projects will
be spent as follows:**

- ¶ 50% green stock
- ¶ 30% listing
- ¶ 10% buy ret and burning
- ¶ 10% Advertising

Green stock

The goal of the team is to share the holders in the profits from physical projects.

What is green stock?

Green stocks refer to stocks of physical projects,

We will distribute these shares in two ways:

- 5% of the revenue from physical projects will be distributed among the holders
- Presell stocks (More details will be provided at the start of the first physical project)

Futures contract

9% for futures sales are locked by Contract

**And the futures system gives a 1% discount on the
ontime price for each month of purchase.**

RET Future Contract :

0x2B1122954502c3b7A9F94E70dED885637f9D31e0

Ret protocols in each trade

1%

REFLECTION

- 1% fee redistributed to all holders including black hole

1%
